Hi, my name is Dalit Barrett and I am a Senior Product Designer from Austin, Texas. I have a passion for creating innovative digital experiences and over 10 years of experience in various areas of digital design, including user experience (UX) and user interface (UI).

I am detail-oriented and have a strong background in working with teams and collaborating with colleagues. I have worked as a Senior Designer in-house for Paperless Post, Sparemin, and Leafly, and most recently I have been working as a freelance designer for clients such as Bloomfire, Spredfast, Vitamin Water, and Target.

I enjoy all aspects of design, from creating a brand to prototyping and front-end development, and I believe that A/B testing is essential when launching digital products.

As a Senior Product Designer for Babylist, I would bring passion and dedication to every project I take on.

Thank you for your time!

Dalit
